EDITORIAL

Creeds For Curing Crisis

THE Labour Party Readquarters have just issued a pamphlet "The ABC of the Crisis," which, strictly speaking is as much Party propaganda as the Conservatives "Industrial Charter." With both, however, can be discerned an interest above Party politics. No British elector, in fact, of whatever political complexion from the deepest blue to the deepest red, could raise objection to five points of the present. six-point guide. These five. points are: firstly, every worker should directly or indirectly turn out as many goods as possible and every person who is able should foln the thinned ranks of those in essential industries. Whether any individual is producing as much as he can in the most important job he can get is primarily a matter for his own conscience. Secondly, the success of the national effort depends upon raising the efficiency of production in every place of work. Joint production committees and other agencies of joint consultation can enlist the experience and enthusiasm of workers. Members of the Party should help develop joint consultation to the highest possible pitch. Thirdly, the national savings movement needs the fullest support. Fourthly, fuel and materials must be saved. Fifthly, vigilance by Party mem-

bers will contribute to the suppoints 1, 2 and 3, a comparison with the Industrial Charter can usefully be made. In the first the Industrial Charter sees Labour Government very much ter but whereas the Conservatives, at the present, can only then ise about the cures for better of the other. 'THE KILLERS' IS HEMINGWAY PLUS

By STEPHEN WATTS

HD crime ration generous this week, but I have no doubt your appetite will be equal to it. Public digestion is sound

when it comes to large portions of murder and mayhem. It's a remarkable thing this.

if you reflect on it for a tive story-telling devices. moment. One of the bases of the cinema's appeal is generally supposed to be self-identification. The argument is that much of your pleasure lies in imagining yourself into the personalities and situations on the screen.

For a couple of hours the girl in the stalls can be, according to fancy, anybody from Grable to Garbo, Lockwood to Loy, Vicariously she is gowned by Adrian and adored by Boyer,

Rarely Glamorous Fine, tailor-made theory, but how then do you account for the popula-rity of murder? It's not much fun identifying yourself with a corpse, and delectives are rarely glamour-

Perhaps this line of thought had better be abandoned here before it becomes uncomfortable. I certainly don't want to suggest

that you will go blithely along to see a film called "The Killers" (Central and Alhambra Theatres) because the title answers the call of the wild within you.

But the dact remains that ' mild characters like you (and certainly me), who would feel terrible to see one sample of death on the roads, will cheerfully watch a multiplicity of deaths on cellulaid.

At the end of "The Killers," when the chief bad man is breathing his last and thus chalking up about the sixth violent expiration in the film, I caught myself thinking with callous detachment what a nice cleft that is Miss Ava Gardner has in her

A Neat Job

Educated by all those films about psychiatry, I should now start worrying if I have a split personality or something. It's all very mysterious, and I leave the problem shamelessly

in your lap.
"The Killers" is a very neat job of taking up a story where the original author left off. If you recall Ernest Hemingway's short story of the same title, you will find it brilliantly realised on the screen in the first 15

Two gummen come to a small town and quite openly kill an ex-boxer, now a garage hand. The film au-thor has imagined the background to this grim execution.

Flouncy, Flat & Figure 8

HE three drawings you see here were made when Robb and I were in Paris for the autumn dress shows in the first week of August.

But so elaborate and cagey has the Paris dress-business become that (by agreement with the syndicate that runs their top-designers) it has riot been possible to release these drawings until now.

WARNING: Don't dismiss the fashions you see here as "absurd" simply because they look extreme. No one pretends that the average Englishwoman is ever going to look exactly like any of these three.

But what is quite indisputable is that the fundamental "outlines" drawn here are the ones that will influence well-dressed women in the coming months.

Briefly this divides fashion into three new silhouettes:--

FLOUNCY: Known as The New Look, this is really early-Victorian. The emphasis is on pudded bust, corseted waist, long, flouncy skirt, Because of the Immense yardage in the skirt (40 yards), this is the most difficult to copy in Britain-but the most likely to be copied in the countries where material is easier.

FLAT: Typical of the 1920 look, The clothes are designed to emphasise rounded shoulders, padded tummy, and slim long legs. .

FIGURE-8: Emphasises rounded lines above and below pinched-waist, Stlff pocket-pleats exaggerate the hips. Stiffened pleats in the bodice, too, accentuate the bust.

NOW during the past several IN weeks—aver since these clothes were first seen in Paris-designers for wholesale dress houses have been at work. Seldom has the move o fashion from Paris been swifter,

STILLMAN'S FOR CLEAR SKIN

Stillman's Freckle Cream contains certain ingredients which act as a temporary "black-out" against the formation of pigment. Next it favors the retention of fat globules in the skin which helps ro smooth out lines and creepiness

It's easy to use—just smooth on at night before tetiting and let it work while you sleep. After using just one regular sized jar you will find your complexion so improved that you will need no urging to continue using Stillman's Freckle

ON BEAUTY

THE girl who gets places in this competitive world is usually the one who plans ahead. If you care about riveting admiring glances get off to a good start by taking stock of your figure. Chances are, you may have added an unflattering inch or two all the way down the line. Consider these liabilities as a challenge. Avoid highly fattening foods and exercise regularly to achieve a noteworthy figure.

Even-Hollywood stars-famous-for their beauty have to include routine body-sculpting exercises in their busy schedules. Nan Leslie, who plays an important role in "The Devil Thumbs a Ride," keeps her lithe and lovely figure that way with a group of simple but effective exercises.

For this year's important doll-waist, lie flat on your back and, withhands clasped, extend arms forward. Rise slowly from the waist to a sitting position. Return to back. Repeat up to ten times, resting after every third. This one is a scissor routine that will help trim your hips to desired

proportions. Lie on right side, arms out. Raise both legs up from hip and, with straight knees, swing first one then the other leg, increasing tempo as you go along. Repeat ten times with rests.

To relieve tension and make for a well co-ordinated body that often is the key to charm, the spine should be kept flexible. Non Leslie in

the picture benins an exercise designed to relax the body.
Sit, legs crossed under you, hands locked lightly behind head and stretch as you would naturally. Maintaining the same cross-legged at-titude, clasp hends overhead, palms up, and pull to the left. Return to creet pose, keeping back and spine straight. Stretch to the right, letting : head fall slowly sidoways. Repeat ten times breathing in and out evenly all the while.

Elizabeth's Wedding Gown Costs £200

Princess Elizabeth's wedding gown, now being stitched from secret designs sketched by the Queen's dressmaker, will cost something under £200, it was disclosed by one of the few persons around the Court who really know.

The informant begged to remain anonymous. But a Palace spokesman declared that a press item asserting that the gown would cost £1,250 and be the equivalent of six years of ration coupons, "bears no resemblance to the truth".

The Board of Trade has allotted the future Queen a special group of coupons for wedding clothes, but has not disclosed how many.

The Palace spokesman said that thousends of Britons had tried to contribute some of their meagre clothing coupons to help the Princess obtain a more extensive trousseau,

"Every single day more coupons come in, from the poor as well as the rich, in letters asking that the Princess have a really gala wedding. All have been returned, of course, but they certainly show the people's affection for the Princess."

The Daily Express said that attempts had been made to bribe employees of Norman Hartnell, maker of the Princess' wedding ciothes, to obtain the designs. Scotland Yard said that no such attempts had been reported to the police. Hartnell's has a private agency guard.—Associated Press.

NOVELTY .

THIS LINKED BRACELET and B ring was worn by Valerie Hobson at'a recent premiere. Originally invented for safety, because she made a habit of losing bracelets, the idea has been developed and amarketed. This one is silvergilt, but these bracelets are ex-틸pensive-price six guineas.

Life * Easier

Weisbaden. Germany—The best-dressed German girl to-day is the American soldier's girl friend.

She sports American freeks, shees, stockings, lipsticks, rouge, handbags, perfume and other items unknown to her less fortunate sisters. And she is well fed.

The non-fraternising German girl is easy to pick out from the GI's girl friend. She wears ersatz shoes with wooden soles. The dress she wears is prewar and shoddy. Her face is devoid of make-up.

The GI's girl friend is now almost unrecognisable from the American wives in Germany. She has a Swiss wrist watch. Paris perfume and fancy costume jewellery.

Other German women look longingly in shop windows that are bare except for poor substitute jewellery made of wood or other materials. practically the only luxury items avallable.

PX Purchases

The GI buys luxury items to outfit his girl friend either in the post exchange or has them sent from the United States. He gets her a job in military government, particularly lf he is an officer. Then she gets one meal a day of American food, served in a large central mess, to supplement her German ration.

American wives and daughters get first chance at all feminine items in the post exchanges. But if items are not sold in about a month or two the PX holds a "sale" to clear out the items at bargain prices.

Unmarried officers and men are permitted to buy feminine items in the sales.

Now that the non-fraternisation ban has been lifted the GI can dechre his intention to wed a German girl four months, before his scheduled departure. One month before departure the marriage is performed .-United Press.

MASKS

The latest beauty treatment on the market for men and women are Yeast-Pac Beauty Masks from London which chase away blackheads, enlarged pores, wrinkles and crowsfeet. Distributed in Hongkong by Messrs. G., C. Saw and Co., these masks are really something new, for they bring the revitalising proper-' Yeast" directly to the pores, and immediately the skin recovers its natural softness, clearness and beauty. Attractively packed in herm'edically heat-scaled pink sachets, the masks are pleasantly perfumed with beneficial extract of

Melena/Rubinstein's

Bring you, leveliness

while you sleep...

To Helena Rubinstein dry skin is the most serious beauty problem. More than seven out of ten women have it. A dry skin ages quickly, lines easily, looks taut. Even if you are twenty and have only a tendency to dryness you will need a gentle lubricant. You may be fifty or sixty and want a cream that is rich. Helena Rubinstein urges you to use these; special lubricating creams at night. Smooth them in, in rhythmic, upward strokes,

Those in the know here now say that the Americans have dropped the Marshall Plan

HF none of that Marshall Plan help ever comes through, if all the hard work of Sir Oliver Franks and the rest of the Paris Conference experts turns out to have been wasted, you can blame it on two things. First, that the conference was held in Paris. Second, that Mr William Clayton, U.S. Economic Under-Secretary, had to come to Paris to visit the conference.

A friend of mine here in Paris has told me how he met Clayton in one of the smartest, most delicious, and most expensive of the Paris restaurants. He saw Clayton's eyes popping out of his head at the Lucullian profligacy of the dishes being served, not only to him, but at all the tables.

And, alas for the conference of Europe's 16 supplicants, Mr Clayton's fellow diners were not dollar-rich Americans, Egyptian millionaires, wealthy Argentinos, or Swiss. They were the same Parisians who always go to these places because they know what is good and don't mind spending £6 per head to get it.

The very next day gift-horse Clayton decided to look his French beneficiary in the mouth.

"Are you sure," he asked the experts, "that you have checked the French demand for grain shipments with all due care? I observe that the wheat-growing area in France is today 30 percent less than in 1939. That is no doubt

splendid for the French. farmers who want to sell more meat and butter on the black market. But Congress will never approve."

Of course, he was told that lack of tractors, agricultural implements, and fertilisers . was in part responsible for French farmers converting to pasture.

But one query started him on a whole chain of others. Clayton asked for cuts by thousands of millions of dollars in the estimated cost to the U.S. of the scheme.

auddenly had a brilliant idea: as Britain will still have a dedicit Ambassador's authority. Could not the committee pre- even after Marshall aid is done pare a plan which would make with in 1951. with its own resources?

minded of the experts.

DON'T suggest that if the POSTSCRIPT: "Outside help" in conference had been held in Geneva or London it would automatically have been a success. There is much that makes Marshall aid difficult to put over, apart from the psychological effect French gastronomy has on Mr Clayton.

The truth seems to be that Marshall and his advisers plunged into this reconstruction and aid project somewhat impulsively. Only now are they beginning to realise what a CIR MARK TURNER, Financial election, but whose personal popucolossally expensive and com- Adviser on Germany to the larity may attract many to vote the pictured scrieme it is—and must Foreign Office, now in Washington list he heads.

NO THOUGHT OF POLITICS

By 66 Candidus "?

ERHAPS the most disquieting aspect in the world today is the almost wilful tendency to brush aside—to ignore—the seriousness of world politics. In England, ten thousand times more thought is given to the forecasting of football results than to devoting thought to the future of the world.

Government tolerates the former-a mass form of gambling which in itself tends to undermine economic stability. Millions of pounds are involved, and it cannot be said that the State benefits. Government fails, however, to take any concrete steps to educate the masses politically. Of course, some may assert that the socialistic doctrine is a form of education. It seems about time that the masses should be warned that another and greater war is probable unless the people themselves are made aware of their responsibilities.

The peace of the world, for which the last war was waged, and during which millions died, is as far from realisation as ever it was. Indeed, if you follow world events at all, you must realise that war appears to be more likely than peace. Unless the people are given guidance along sane and logical lines of reasoning, their complacency

may be rudely disturbed.

DUSSIA, is of course, the A recent appreciation of the current situation, especially with regard to the United States and Russia, has been written by Cyril Falls, Chichele Professor of the History of War, Oxford. Says Falls: "The United States will champion those ideals upon which it places so much importance in its own social life. and will leave it to the world to judge between them and those

of Soviet Russia." American ideals, as practised in the United States, are open to the whole world to understand and judge. The same, unfortunately, cannot be said about Russia, whose great country is in the greater part a closed book, jealously guarded against the eyes of other nations who wish to observe for themselves the effect of Russian ideology amongst the Russian masses. If the Russian form of Government is ideal, and at the same sime preserves and guards the rights of the individual, why should there be any desire to hide it from the rest of the

We do know that Russia appears to be determined to spread her doctrines throughout the world, and we also know that many freedom-loving nations do not desire Russian interference in their internal and domestic affairs.

MYRIL Falls analyses the position very succinctly in the following: "Although our own policy need not and should not be slavishly modelled upon that of the United States, we also have had proof that subservience to Russian demands wins us no res-So it was left-still unsolved. CHICAGO PUTS THE HEAT ON THE UNDERWORLD

By ROBERT T. LOUGHRAN

MICAGO'S hoodlums put their pearl grey hats in mothballs and went into hiding when the police declared an "open season" on the city's underworld for the first time in 12 years.

Police Commissioner John Prendergast ordered a "continuous" war on the hoodlums' activities, which range from running gambling rooms to selling bottled water to night clubs. Not since the days when

"Scarface" Al Capone's syndicate terrorised Chicago's gangland have police been ordered on an all-out hunt for underworld characters. This new war on the "hoods," many of them former "disciples" of Capone, was declared as the result of testlmony given at a Civil Service Commission hearing of charges against two police officers.

The officers accused authorities of "railroading" policemen who arrest well-known gangsters. Prendergast got "fighting mad" and responded by telling the

policemen to go out and do the

He ordered that all "known "hoodlums" be arrested on sight. He was even contemplating sending out a secret "hoodlum squad" of 10 or 20 handpicked detectives to track down the underworld characters.

Assistant State Attorney Wilbert F. Crowley said it was going to be a concentrated drive, and Sheriff Elmer Walsh said the hunt would be spread throughout Cook county.

But most of the hoodlums either were out of town, doing the resort circuit, or were in hiding, waiting for "things to cool off." They shed their grey hats, white silk shirts and patent leather shoes, long the trade mark of Chicago gangsters. If they were circulating, no one knew about it.

It appeared that the "hoods" would stay out of circulation for some time, as the result of Prendergast's orders for unrelenting war on rackets.

The clean-up campaign came as a direct result of the hearing of charges against police Capt Thomas Connelly and Lt. William Drury. They are fighting charges that they conspired to bring about false indictments against three men accused of shooting James M. Ragen, Sr., racing information czar. Ragen was wounded by un-

known assailants on June 24, 1946, and died two months later. Announcement of the war on gangsters came just two days after State Attorney William Tuohy had released a transcript of his questioning of Jack Guzik, reported heir to a good share of Al Capone's "business ventures,"

Before he died, Ragen dictated a lengthy statement in which he charged that Guzik and other, syndicate members were trying to "muscle in" on his business, the dissemination of horse race results to handbooks,-United

lower topsail? And the old ship

And, laughing, they slapped

WAS born in West Derby- fellows, counting out gold soverroad, Liverpool, on July 15, eigns and stowing them in their 1883, the second of six overcoat pockets. children. My father, a Scot, kept an ironmongery shop. My mother was a Lancashire woman.

Except for an uncle who was a sea captain, smelt excitingly of whisky and cigars, and did all in his power to prevent me from going to sea, my family had no connection with ships.

My father was a God-respecting man. Sailbrs both he and my mother considered drunken ne'er-do-wells-my uncle was no exception in their eyes.

He was not a blood relation, wallowing around and rolling anyway, and had committed the her guts out? pagan sin of running away from home to join a ship.

But a mile from my house ashore. Only fools go to sea!" were the great Liverpool docks, crowded with fine, tall sailing me painfully on the shoulder ships, and many steamships, and rolled out of the office.

From my early boyhood I -loved-to-see-them,-to-play-nearthem in some leaky old rowboat tied astern until, with fellow scamps, I was chased away.

Then one of my schoolmates left school and went to sea. When he came back a year later in all the glory of uniform, brass buttons and tanned-skin, I revered him as a hero.

From that moment the tremondous ambition fired itself in me-I would be a sailor. I was 12 years old.

School continued until I was 14, and then my father started me in an office job with a marine insurance company at 4s. a week, trusting that a saner, commercial acquaintance with sea matters would show the folly of romantic dreams of sailing before the mast.

_3 CAPTAINS

Say: "Stay ashore. Only fools go to sea"

RUT sea fever was in my blood and would not be denied. It soon found something to batten on—the first ship's log book that I ever saw, sent to the office in a claim following the dismasting of a barque off Cape Horn.

To me it was a stirring ocean drama. I found more old log books and pored over them when I should have been working.

In three months my head be--came as stuffed with sea lore as any old shellback's.

I demanded again and again to go to sea, but my parents remained opposed. They were staunchly backed up by my uncle, the sly dog, who chewed his cheroot in disgust at how poor a life it was.

"You don't look poor, uncle," I would retort, and got bundled out of the room for-my cheek. - Moved to the Anglo-American Oil Company as a Gs. a week clerk, I saw three sea cap-

tains. They were big, bronzed

One evening I did not go home from the office. I was determined to stow away in a windjammer.

But the body was weaker than the spirit, and at 11 p.m., tired and hungry after crude attempts to board a ship, I went home. I got a beating and was sent to bed-supper-

My father got so tired of hearing me bleating about hating the office that eventually I was taken to the family doctor in an attempt to prove that in any case I was a too frail and softly nurtured mite to stand the rigours of life at sea.

I was a small, rather puny lad To my parents' dismay the and they must have been primed doctor diagnosed: "It'll do him about my continual chatter of a world of good. Make a man of him."

Grasping my shoulder with a hand the size of a shovel, one and now my father had to make said: "So you want to go to up his mind whether he could sea, my lad? Lay over there and let's have a look at the cut of spare the money to sign me as Then another said: "How ping company.

The Softball Fans Will Be Yelling Their. Heads Off Again Soon

(By "SPECTATOR")

This year's official softball season is to start shortly—probably in the next weekend, but in that connection there is this question: Is the game going to return to its former pre-war popularity? Time will tell but there is reason for optimism that the once popular game will return to its pre-war prominence, or at least very near it. ..

THE FLYING BRAIN' TALKS ABOUT HIS TRIP ..

ARTHUR COOK

OR the 10 hours 15 minutes that the American Skymaster flew the Atlantic with no one at the controls, 29electronics engineer | civilian from Colombus, Ohio, hardly left the "automatic brain" for a moment.

Occasionally he played gin rummy with the emergency crew, won 60 cents on the trip, but his eyes were on his instrument panel more than they were on the cards.

It was James Anast who built the "brain."

"Crazy" about electrical engineering, James Anast was drafted into the American Army as an infantryman early in the war. His big chance came in 1942 when he was sent to England to study radar with the

The MAN

He told me: "Many of the things the R.A.F. taught me are in this "brain." Without the R.A.F. training I couldn't have done the job for this flight."

It was in 1945 that American radar experts first thought of an automatic brain, and 18 months ago James Anast set to up. Time: 12.31 a.m. Monday. work to build the set for the high-sounding All-weather Flying Division of the American Army Material Command.

Anast's job began with the as- not do this yet. sembling of all the available experience of radio alds for navigation, sutomatic pilots, and beam

SIOUX HONOUR THE RAF

An unusual event took place during the recent brick visit of the RAF Empire Air Navigation School's Lincoln "Aries 11" to the U.S. A. While at an air force station at Rapid City, South Dakota, in the heart of the Sloux country, the Commandant of the School, Air Commodore N. H. D'Acth, was invited to become a member of the Sloux tribe.

The ceremony took place in the Sloux - reservation, and was conducted by the 97-year-old chief, "Black Elk," who spoke throughout in his own language. His speech was translated by his son, "Crazy

The Chief said that his tribe of some 48,000 Indians had watched with admiration the brave conduct of the British people during their ordeal in the Battle of Britain. The Sloux were a fighting tribe and admired a brave people. The crew of "Arles 11" were the first fighting Englishmen whom they had been able to meet, and as a mark of their admiration of the British people as a whole he wished to welcome Air Commodore D'Aeth as a member of the Sioux tribe.

The British people could only have stood up to their ordeal if they had lenging country for British brains, Jesselton, with its natural har. | possessed brave hearts, and therefore he named Air Commodore D'Aeth "Shanti Oheti-Ka," meaning "Brave Heart."

> The ceremony concluded with the presentation of the traditional feathered headdress, prayers to the four great gods and a ceremonial

Five-Point Plan For Indonesia

The Batavia Chinese daily, Kong Po, has proposed a fivepoint plan of action for the. Netherlands which, it said, would best serve the interests of Overseas Chinese. It advocates:

1. Dutch forces should not withdraw from any place where steps have not been taken to safeguard the lives and property of Chinese. 2. Dutch forces should not enter

any places except with the intention after the Dutch leave.

3. Dutch forces should take action to protect Chinese in the hitherto unoccupied (Nationalist held) regions of the interior. 4. Chinese driven from Pangkalan Bronden, a town just outside the

Dutch lines in Sumatra, should be freed from their present danger. They are reportedly interned by Indonesians, 5. The Dutch government should

ALL-WAVE RECEIVERS

Thoroughly engineered to provide lasting satisfaction, this advanced receiver offers the exclusive new Farnsworth Band-O-Lite tuning dial. Taking all the guesswork out of station determination, the Band-O-Lite Dial completely illuminates the respective wave band selected, enabling the operator to arrive at the definite frequency shown at the intersection of the lighted band indicator and the station selector. Five wave bands including standard, tropical and short wave reception. Band spread. Cabinet styling has been patterned to complement the advanced chassis design. Top and sides are of genuine selected walnut vencers while the balance of the cabinet has been carefully finished to simulate native striped walnut, and expressive blond burl. This instrument incorporates a phono-jack for plug-in phonograph operation.

their hands, though but, oh, that punch! the magazines which print his work may have, if they continue to bed him out alongside synthetic prefabricated romances which satisfy what IF I were to dare to mock a they take to be a dreary and unambitious reading taste.

SAD ROAD TO THE SEA.

by Gerald Kersh.

(Heinemann, 8s. 6d.)

has amused me to tell stories IVE leave me punch drunk. and I have told a great many. They arrive in a series of jabs It is a misfortune, for me, that the telling of a story just for and hooks, with an occasional the sake of the story is not an straight left which has me down activity that is in favour with for the count stunned with to bear my misfortune with tire of this rough handling, after the thirty-five encounters provided by the book.

Tiredness comes inevitably gentsia? Is it the thousands whether you have ocen clouted who switch on the Third Pro- clumsily or artistically. Kersh gramme, go to the ballet, put is objective, highly trained, books, pack the concert halls, or terse and hard. His great talent read with humble attention the lies in his assurance in delineatworks of Somerset Maugham? ing character. Each character

Or is it some lunatic fringe is surrounded by a slice of life

Some of these stories have a neat filing systems of Mr beginning and some an end. Mr. Kersh's vivid and too fertile technique generally dispenses

> They abuse the storyteller's and the impact of a novel. As Mr Maugham has slices of life, they never fail to nothing to fear at be realistic and convincing-

> > NINETEEN STORIES. by Graham Greene. (Heinemann, 8s. 6d:)

certain style of undertone in contemporary literature, I would tell myself that I was All that remains to overdoing it with a sentence be said is that every like this: "Directly he heard his The preface contains a spirit- story which follows the short, landlady's; feet upon the stairs the elderly man with the grey shaven head began to lay his wet tea-leaves round the base of the aspidistra."

> It is a shame to lift such a quotation from Mr. Graham Greene, who is one of the most distinguished imaginative writers alive. The quotation, which comes from almost the best short story in the book-"When Greek Meets Greek"-ds an awful example of how the subnormal, ugly, all-too-human and unlikeable characteristics of the lower middle class have become the literary fashion.

Graham Greene can sound all the undertones of our civilisation with assured skill. He can clothe the

drab and the ordinary with significance. But I wish he would not fourid a school of polite auguish.

Confessing in his introductory note that the whort story "is an exacting form which I, have never properly practised," and that these tales are presented as "the byproducts of a novelist's career," the author gives advance warning of rather patchy performance.

I have never, however, read bad book by Mr. Greene, and recommend these by-products as mostly up to the Greene standard.

PAPER CHASE-Five books-all in English but printed abroad (three in Paris, two in Amsterdam). Idea of using Europe's off-the-ration paper and not-sobusy printers was originated by Pilot Press with the blessing of the Treasury; part of the output goes to export. Idea is now so popular-one group of publishers has its own cross-Channel motor vessel bringing in 250,000 reprints a fortnight—that publishing problems abroad are almost as bad as here.

Enterprising publishers are now looking for Scandinavian printers.

Author NANCY MITFORD WILL play one of her own character creations in the film of her novel, "Pursuit of Love," now being made in Hollywood. -

NORMAN ("London Belongs to Me") COLLINS, now finishing a children's novel, "Black Ivory," will soon be starting long novel Warms it may take three years

And still on the "London-Belongsto-Me" theme, NOEL STREAT. FEILD uses a similar idea but shifts the locale from Kennington, S.E. to a better address-Mayfair, W. I .- for her coming "Grass in Piccadilly."

"This Other Eden," one of the first Australian best-sellers to be published over here was written by 17 - year - old school - girl (LAPHERINE GASKIN, storted it when she was 15.
